PROJECTS

SMARTCAPTURING OF INTENDEDFOOTFALLS

- Counting of Footfalls in Showrooms is very important for organizations and it becomes difficult for organizations to monitor footfalls in a large scale.
- In recent years image processing technology is being developed and many classifiers are available to classify and recognize different objects.
- We propose a low-cost Image Processing based Intelligent System that overcomes the drawbacks of existing system.
- This system not only counts the footfalls but also makes the insights and extracts meaningful patterns from the footfalls data.

YOUTHRIVE2K18 WEBSITE

- WISTM College has organized a national level technical fest called Youthrive2k18 on 21-Dec-2018.
- We have designed a website for the fest containing all the details regarding the Events, Guests, Sponsors, Student and sponsor registration forms etc..
- Almost 5000 students have registered though this website. The website is still live at http://wistm.edu.in/youthrive2k19.

ONLINE EXAMINATION SYSTEM

- Today, Online Examination System is considered a fast-developing examination method Because of its accuracy and speed. .
- It is also needed less manpower to handle the examination. Almost all organizations today managing Their exams by online examination system.
